A Greener Christmas

It's the season of excess, but you can still enjoy the holiday season and be gentler on our environment; we've come up with some tips to help you be more eco-friendly this Christmas:

Use recycled paper & re-use gift wrapping

Shop locally - do your shopping in your community and try to find products made locally to decrease transportation emissions

Consider alternative gifts such as experiences or 'pay it forward' gifts

Avoid gifts with batteries; eventually they may end up in landfill where they will leach toxic materials into the soil

Use energy efficient or solar powered christmas lights
